The OECI aim is to accelerate the application of multidisciplinary personalised care approaches, good practices with patients, biobanks and pathobiology, supportive and palliative care, cancer outcomes research and prevention, patient involvement and integration with translational research. The certified centres represent the so-called “OECI Quality Network”. In our mission to fulfill today’s cancer patients’ expectations.

Our Organisation in order to benefit from our Accreditation and Designation Programme for a continuous update of their infrastructure, in areas covered by population registries, comparative analyses between population and clinical sets of data, to improve the production of new effective protocols of treatment, a study aiming to a practical adoption of N-trials is under development. The WG collaborates with the OECI Accreditation and Designation Programme for a continuous update of the standards to be adopted. The OECI Pathology Day is the main annual event organised by this WG.

Strategic priorities for the OECI

The OECI Strategic Plan is designed to optimise the potential benefits and impact of the OECI network for its Members and for cancer patients, whilst also making the most efficient use of the financial and human resources. It also reflects the current needs of our Members and the cancer research community. The priorities for the OECI in the strategic plan are the following:

1. To increase and promote the OECI network’s visibility, attracting new Members and participants, and to engage more effectively with patients and their organisations.
2. To support the implementation of the standards to be adopted. The OECI Accreditation and Designation Programme for a continuous update of the standards to be adopted. The OECI Pathology Day is the main annual event organised by this WG.
3. To enhance the OECI network’s impact on European cancer care and research, by increasing the visibility of the OECI network and the OECI standards across the EU and beyond.
4. To increase the OECI network’s capacity to deliver high-quality care and research, by investing in the development of new European cancer care and research standards and supporting their implementation across the EU.
5. To increase the OECI network’s capacity to deliver high-quality care and research, by investing in the development of new European cancer care and research standards and supporting their implementation across the EU.
6. To increase the OECI network’s capacity to deliver high-quality care and research, by investing in the development of new European cancer care and research standards and supporting their implementation across the EU.
7. To increase the OECI network’s capacity to deliver high-quality care and research, by investing in the development of new European cancer care and research standards and supporting their implementation across the EU.

The OECI Strategic Plan is designed to optimise the potential benefits and impact of the OECI network for its Members and for cancer patients, whilst also making the most efficient use of the financial and human resources. It also reflects the current needs of our Members and the cancer research community. The priorities for the OECI in the strategic plan are the following:

1. To increase and promote the OECI network’s visibility, attracting new Members and participants, and to engage more effectively with patients and their organisations.
2. To support the implementation of the standards to be adopted. The OECI Accreditation and Designation Programme for a continuous update of the standards to be adopted. The OECI Pathology Day is the main annual event organised by this WG.
